

Polyethylene Spill Trays

Control messy, slippery spills and keep workplaces clean.

EcoPolyBlend™ Spill Trays are made of 100% post-industrial recycled polyethylene.

They are ideal for catching and containing drips and leaks from small equipment, vehicle batteries, or pouring and filling activities. Lightweight and durable, these rigid polyethylene (HDPE) spill trays have excellent chemical resistance and make clean-up a snap. They feature a ribbed bottom and are rated for service temperature between -30° to 120°F (-34° to 49°C), making them suitable for indoor or outdoor use.
